

The Hongkong and Shanghai Banking Corporation Limited

Interim Disclosure Statement

prepared under the Banking (Disclosure) Rules made pursuant to section 60A of the Banking Ordinance

Supplementary Notes for the six months ended 30 June 2011

The information contained in this document is for The Hongkong and Shanghai Banking Corporation Limited ('the Bank') and its subsidiaries (together 'the group'). It is supplementary to and should be read in conjunction with the 2011 Interim Consolidated Results Press Release issued on 1 August 2011, available at www.hsbc.com.hk. The information in the two documents, taken together, complies with the Banking (Disclosure) Rules made under section 60A of the Banking Ordinance.

1. Basis of preparation

- a. The group uses the advanced internal ratings-based approach to calculate its credit risk for the majority of its non-securitisation exposures and the internal ratings-based (securitisation) approach to determine credit risk for its securitisation exposures. For market risk, the group uses an internal models approach to calculate its general market risk and market risk relating to equity options. The group uses an internal models approach to calculate its market risk in respect of specific risk for the interest rate risk category. The group uses the standardised (market risk) approach for calculating other market risk positions and the standardised (operational risk) approach to calculate its operational risk. There are no changes in the approaches used in 2011.
- **b.** Except where indicated otherwise, the financial information contained in these supplementary notes has been prepared on a consolidated basis. The basis of consolidation for regulatory purposes is different from that for accounting purposes. Further information regarding subsidiaries that are not included in the consolidation for regulatory purposes is set out in Supplementary Note 26.
- c. The accounting policies applied in preparing these supplementary notes are the same as those applied in preparing the consolidated financial statements for the year ended 31 December 2010, as set out in Note 3 on the financial statements on pages 38 to 54 of the Annual Report and Accounts.

¹ Certain comparatives have been restated to reflect changes in classification in the current period disclosure

a. Analysis of advances to customers by industry sector based on categories and definitions used by the Hong Kong Monetary Authority ('HKMA') (continued)

The most common method of mitigating credit risk is to take collateral. Collateral includes any tangible security that has a determinable fair market value and is readily marketable. This includes (but is not limited to) cash and deposits, stocks and bonds, mortgages over properties and charges over other fixed assets such as plant and equipment. Where collateral values are greater than gross advances, only the amount of collateral up to the gross advance is included.

b. *Individually assessed impaired advances to customers*

The geographical information shown below has been classified by the location of the principal operations of the subsidiary company or, in the case of the Bank, by the location of the branch responsible for advancing the funds.

	Hong Kong HK\$m	Rest of Asia-Pacific HK\$m	Total HK\$m
At 30 June 2011			
Gross individually assessed impaired advances	3,656	9,451	13,107
Individually assessed impairment allowances	(2,238)	(4,825)	(7,063)
	1,418	4,626	6,044
Gross individually assessed impaired advances as a percentage of gross advances to customers	0.3%	1.0%	0.6%
Fair value of collateral which has been taken into account in respect of individually assessed impaired advances to customers	1,194	2,944	4,138
At 31 December 2010			
Gross individually assessed impaired advances	4,804	10,210	15,014
Individually assessed impairment allowances	(2,615)	(5,644)	(8,259)

Fair value of collateral which has been taken into account in respect of individually assessed impaired advances to customers	1,463	2,887	4,350

The most common method of mitigating credit risk is to take collateral. Collateral includes any tangible security that has a determinable fair market value and is readily marketable. This includes (but is not limited to) cash and deposits, stocks and bonds, mortgages over properties and charges over other fixed assets such as plant and equipment. Where collateral values are greater than gross advances, only the amount of collateral up to the gross advance is included.

b. Individually assessed impaired advances to customers (continued)

For individually assessed customer advances where the industry sectors comprise not less than 10% of the total gross advances to customers, the analysis of gross impaired advances and allowances by major industry sectors based on categories and definitions used by the HSBC Group is as follows:

At 30 June 2011	Total gross advances HK\$m	Gross impaired advances HK\$m	Individually assessed allowances HK\$m	Collectively assessed allowances HK\$m
Residential mortgages	573,080	2,353	(411)	(193)
Commercial, industrial and international trade	694,830	7,408	(5,149)	(1,938)
Commercial real estate	230,905	771	(256)	(66)
At 31 December 2010				
Residential mortgages	520,829	2,274	(375)	(216)
Commercial, industrial and international trade	585,273	8,445	(5,989)	(1,898)
Commercial real estate	217,946	893	(254)	(54)

Collectively assessed allowances refer to impairment allowances which are assessed on a collective basis for those individually assessed advances where an individual impairment has not yet been identified.

c. Overdue advances to customers

The geographical information shown below and in note 9d has been classified by the location of the principal operations of the subsidiary or, in the case of the Bank, by the location of the branch responsible for advancing the funds.

Fair value of collateral held in respect of overdue advances	823		2,044		2,867	

The most common method of mitigating credit risk is to take collateral. Collateral includes any tangible security that has a determinable fair market value and is readily marketable. This includes (but is not limited to) cash and deposits, stocks and bonds, mortgages over properties and charges over other fixed assets such as plant and equipment. Where collateral values are greater than gross advances, only the amount of collateral up to the gross advance is included.

At 31 December 2010	891	0.1	2,793	0.3	3,684	0.2	

Rescheduled advances to customers are those advances which have been restructured or renegotiated because of a deterioration in the financial position of the borrower, or because of the inability of the borrower to meet the original repayment schedule.

Rescheduled advances to customers are stated net of any advances which have subsequently become overdue for more than three months and which are included in 'Overdue advances to customers' (note 9c).

11. Cross-border exposures

The group's country risk exposures in the table below are prepared in accordance with the HKMA return of External Positions Part II: Cross-Border Claims (MA(BS)9B) guidelines.

Cross-border claims are on-balance sheet exposures to counterparties based on the location of the counterparties after taking into account the transfer of risk.

The table shows claims on individual countries and territories or areas, after recognised risk transfer, amounting to not less than 10% of the aggregate cross-border claims.

Cross-border risk is controlled centrally through a well-developed system of country limits and is frequently reviewed to avoid concentration of transfer, economic or political risk.

Risk-weighted amounts	202,322	217,098

The table above gives the nominal contract amounts and risk-weighted amounts of contingent liabilities and commitments. The information is consistent with that in the 'Capital Adequacy Ratio' return submitted to the HKMA. The return is prepared on a consolidated basis as specified by the HKMA under the requirement of section 98(2) of the Banking Ordinance.

For accounting purposes, acceptances and endorsements are recognised on the balance sheet in 'Other assets' in accordance with Hong Kong Accounting Standard 39 'Financial Instruments: Recognition and Measurement'. For the purposes of the Banking (Capital) Rules, acceptances and endorsements are included in the capital adequacy calculation as if they were contingencies.

Contingent liabilities and commitments are credit-related instruments. The contract amounts represent the amounts at risk should the contracts be fully drawn upon and the customers default. Since a significant portion of guarantees and commitments are expected to expire without being drawn upon, the total of the contract amounts is not representative of expected future cash flows.

22. Derivative transactions

a. Contract amounts of derivative transactions

	At 30 June 2011 HK\$m	At 31 December 2010 HK\$m

Equities, commodity and other	819,833	494,869
	31,181,081	25,799,643

Derivatives arise from futures, forward, swap and option transactions undertaken by the group in the foreign exchange, interest rate, equity, credit and commodity markets. The contract amounts of these instruments included in the table above indicate the volume of transactions outstanding at the balance sheet date. They do not represent amounts at risk.

b. Risk exposures to derivative transactions

Equities, commodity and other	208,054	1,260	4,236
	23,125,480	55,819	70,797

¹ Fair value is calculated after taking into account the effect of valid bilateral netting agreements amounting to HK\$234,252m at 30 June 2011 (31 December 2010: HK\$225,484m).

22. Derivative transactions (continued)

The table above gives the contract amounts, the risk-weighted amounts and the fair value of derivative exposures. The information is consistent with that in the 'Capital Adequacy Ratio' return submitted to the HKMA. The return is prepared on a consolidated basis as specified by the HKMA under the requirement of section 98(2) of the Banking Ordinance.

Fair value is a close approximation of the credit risk for these contracts at the balance sheet date. The actual credit risk is measured internally as the sum of positive fair values and an estimate for the future fluctuation risk, using a future risk factor.

The netting benefits represent amounts where the group has in place legally enforceable rights of offset with individual counterparties to offset the gross amount of positive mark-to-market assets with any negative mark-to-market liabilities with the same customer. These offsets are recognised by the HKMA in the calculation of risk-weighted amounts for the capital adequacy ratio.

23. Foreign exchange exposure

Foreign exchange exposures may be divided broadly into two categories: structural and non-structural. Structural exposures are normally long-term in nature and include those arising from investments in overseas subsidiaries, branches, associates and strategic investments as well as capital instruments denominated in currencies other than Hong Kong dollars. Non-structural exposures arise primarily from trading positions and balance sheet management activities. Non-structural exposures can arise and change rapidly. Foreign currency exposures are managed in accordance with the group's risk management policies and procedures.

The group had the following net structural foreign currency exposures that were not less than 10% of the total net structural positions in all foreign currencies:

	Net structural position

Chinese renminbi	122,017	143,909
Indian rupees	179,314	31,178

23. Foreign exchange exposure (continued)

The group had the following non-structural foreign currency positions at 30 June 2011. The USD, SGD and BRD positions were not less than 10% of the group's net non-structural positions in all foreign currencies at 30 June 2011:

Net options positions	13,842	(127)		(100)
	(13,706)	10,590	(10,339)	(1,439)

The net options positions reported above are calculated using the delta-weighted position of the options contracts.

24. Liquidity ratio

The Banking Ordinance requires banks operating in Hong Kong to maintain a minimum liquidity ratio of 25%, calculated in accordance with the provisions of the Fourth Schedule of the Banking Ordinance. This requirement applies separately to the Hong Kong branches of the Bank and to those subsidiary companies which are authorised institutions under the Banking Ordinance.

The average liquidity ratios for the period are as follows:

	Half-year ended 30 June	Half-year ended 30 June
	2011 %	2010
Hong Kong branches of the Bank	33.3	42.6

¹ Comparatives have been restated to exclude internally generated back to back positions.

25. Capital adequacy

The capital ratios and risk weighted assets on a consolidated basis, calculated in accordance with the Banking (Capital) Rules, are as follows:

Capital Ratios	At 30 June 2011 %	At 31 December 2010 %
Capital adequacy ratio	14.5	14.7
Core capital ratio	11.7	11.7
Risk weighted assets	At 30 June 2011 HK\$m	At 31 December 2010 HK\$m

Total	1,714,041	1,612,103
Deductible items	At 30 June 2011 HK\$m	At 31 December 2010 HK\$m

The Bank and its banking subsidiaries maintain a regulatory reserve to satisfy the provisions of the Banking Ordinance and local regulatory requirements for prudential supervision purposes. The effect of this requirement is to restrict the amount of reserves which can be distributed to shareholders.

Total of items deductible 50% from core capital and 50% from supplementary capital

In accordance with updated guidance from the HKMA, the regulatory reserve has been increased to HK\$12,774m (31 December 2010: HK\$7,702m).

There are no relevant capital shortfalls in any of the group's subsidiaries as at 30 June 2011 which are not included in its consolidation group for regulatory purposes.

The following table shows the components of the capital base contained in the 'Capital Adequacy Ratio' return required to be submitted to the HKMA by The Hongkong and Shanghai Banking Corporation Limited on a consolidated basis that is specified by the HKMA under the requirements of section 98(2) of the Banking Ordinance.

- 1 Includes the revaluation surplus on investment properties which is reported as part of retained profits and adjustments made in accordance with the Banking (Capital) Rules issued by the HKMA.
- 2 Includes adjustments made in accordance with the Banking (Capital) Rules issued by the HKMA.
- 3 Total regulatory reserve and collective impairment allowances are apportioned between the standardised approach and internal ratings-based approach in accordance with the Banking (Capital) Rules issued by the HKMA. Those apportioned to the standardised approach are included in supplementary capital. Those apportioned to the internal ratings-based approach are excluded from supplementary capital.
- 4 Excess impairment allowances over expected losses are applicable to non-securitisation exposures calculated by using the internal ratings-based approach.

26. Principal subsidiaries and basis of consolidation

The basis of consolidation for accounting purposes is in accordance with Hong Kong Financial Reporting Standards ('HKFRS'). HKFRS is a collective term which includes all applicable individual Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards and Interpretations issued by the Hong Kong Institute of Certified Public Accountants.

The major subsidiaries of the Bank for accounting purposes are:

Hang Seng Bank Limited
HSBC Bank (China) Company Limited
HSBC Bank Malaysia Berhad
HSBC Bank Australia Limited¹
HSBC Bank (Taiwan) Limited¹
HSBC Insurance (Asia) Limited¹
HSBC Life (International) Limited¹

1 Held indirectly

The basis of consolidation for regulatory purposes is different from the basis of consolidation for accounting purposes. Subsidiaries included in the consolidation for regulatory purposes are specified in a notice from the HKMA in accordance with section 98(2) of the Banking Ordinance. Subsidiaries not included in consolidation for regulatory purposes are securities and insurance companies that are authorised and supervised by a regulator and are subject to supervisory arrangements regarding the maintenance of adequate capital to support business activities comparable to those prescribed for authorised institutions under the Banking (Capital) Rules and the Banking Ordinance. The Bank's shareholdings in these subsidiaries are deducted from its core capital and supplementary capital as determined in accordance with Part 3 of the Banking (Capital) Rules.

26. Principal subsidiaries and basis of consolidation (continued)

With respect to notes 21, 22b and 25, the principal subsidiaries that are not included in the consolidation for regulatory purpose are:

Hang Seng Insurance Company Limited

HSBC Insurance (Asia Pacific) Holdings Limited and subsidiaries

HSBC Futures (Singapore) Pte Ltd

HSBC Securities Japan Limited

Hang Seng General Insurance (Hong Kong) Company Limited

HSBC Securities Brokers (Asia) Limited

The group operates subsidiaries in a number of countries and territories where capital is governed by local rules and there may be restrictions on the transfer of regulatory capital and funds between members of the banking group.

27. Statutory accounts

The information in this document is not audited and does not constitute statutory accounts.

Certain financial information in this document is extracted from the statutory accounts for the year ended 31 December 2010 which have been delivered to the Registrar of Companies and the HKMA. The Auditors expressed an unqualified opinion on those statutory accounts in their report dated 28 February 2011. The Annual Report and Accounts for The Hongkong and Shanghai Banking Corporation Limited for the year ended 31 December 2010, which include the statutory accounts, can be obtained on request from Group Communications (Asia), The Hongkong and Shanghai Banking Corporation Limited, 1 Queen's Road Central, Hong Kong, and may be viewed on our website: www.hsbc.com.hk.
